

MetaniQ

**80% GHG saving.
Guaranteed.**

Compliance software for biomethane

DM 2022 / RED III / UNI-TS 11567:2024

1,000+ biomethane plants in Italy.

All must prove GHG saving $\geq 80\%$ or lose the incentive.

Manual calcs. Scattered Excels.

Errors in RINA / SGS audits.

80% threshold missed = -150k EUR/year.

80% GHG saving is the difference between incentive and nothing. Certainty is needed.

Metan.iQ

One platform. Zero Excels.

Enter feedstocks

every day -- like a log

2

Enter net Sm3

from the REMI cabin

3

Certain compliance

GHG saving computed in real-time

RED III Annex V Part C

UNI-TS 11567:2024 - GSE Guidelines 2024

Monthly GHG saving =

$$(80 - e_w) / 80 \times 100$$

$$e_w = \text{SUM}(e_i \times \text{Energy}_i) / \text{SUM}(\text{Energy}_i)$$

Aggregated on the MONTHLY LOT. Not a daily average.
'Bad' days offset 'good' days.

42 feedstocks

Manure credit (-45 gCO2/MJ)

BMT override from lab analysis

ep total floor >= 0 (RED III Ann.V)

LHV 9.79 kWh/Sm3 (UNI EN 16723-1)

Audit-ready compliance. In 3 clicks.

322

automated tests

42

feedstocks in DB

9

regulations integrated

15

years business plan

Branded official reports. Audit-ready from day one.

Monthly PDF

7 branded pages: outcome, KPIs, constraints, audit trail.

Excel 4 sheets

Summary, daily, registry, constraints.

CSV

Sep ; - dec , - UTF-8. Opens directly in Italian Excel.

Certification body dossier

Mass balance, regulatory sources, supplier declarations.

Business Plan

15 years: CAPEX, OPEX, PNRR, NPV, IRR, FCF.

9 regulations integrated. Zero interpretations.

- DM 15/09/2022 - Italian biomethane grid tariffs
- RED III (EU Dir. 2023/2413) - GHG thresholds Annex V Part C
- RED II (EU Dir. 2018/2001) - Previous framework
- D.Lgs. 199/2021 - Italian transposition of RED II
- UNI/TS 11567:2024 - GHG calculation, standard yields, LS
- GSE Guidelines 2024 - Decree 248/2024
- JEC WTT v5 - Default emission factors
- EU Reg. 2022/996 - GWP CH₄=28, N₂O=265
- UNI EN 16723-1 - Grid biomethane specifications
